

The Shepherd's Hut

The Shepherd's Hut sleeps 2 and is a new addition to the campsite, here at Caerfai Farm.

The bespoke Shepherd's Hut has been beautifully constructed to an exceptional standard in Pembrokeshire by <https://stockmanshepherdhuts.co.uk> Designed and built solely by craftsman Paul Stock and made with traditional, locally sourced materials.

The Shepherd' Hut is suitable for couples due to its cosy arrangement! (Please let us know if you are booking for a special occasion and need assistance with any plans you may have in mind, we are happy to help!)

About the hut

The exterior is clad in oak and has a corrugated roof. Four steps lead up to the split stable-door. This can be hooked back, or half closed. The interior oak flooring conceals the thermostat/time controlled underfloor-heating; the walls are tongue and grooved. There are two interior lights and one exterior. Two main windows - one campsite facing and the other affording spectacular views over Caerfai Bay to the south and south east. There is also a small window to the rear of the hut. All windows are double glazed and can be opened and closed securely with their traditional fittings. (The main windows are fitted with Roman blinds). There are two double plugs, suitable for low wattage appliances i.e. charging mobile devices and use of the hob and fridge).

The cosy living area includes a small comfortable double bed (4' wide) with freshly laundered bedding and sheets (double duvet). There is a wooden chair next to the bed. Two fold-out chairs can be used for sitting at the small table.

Inventory:

- Double induction hob
